Leader in Safety, Security
and Productivity
for Heavy Transportation
and Large Fleets

TrailerCam™ offers an innovative solution to one of the top causes of accidents in the trucking industry: backing up into a dock or narrow street.

TrailerCam™ — CONVOY TECHNOLOGIES' **REMOVABLE WIRELESS BATTERY OPERATED CAMERA** transmits high quality, latency free wireless video images and audio to a display located in the cab.

TrailerCam™ can be easily connected and re-connected to the back or side of the truck or tractor/trailer.

Eliminates high cost of labor and installation of running cables

Allows usage with different trailers, swapping trailers and pairing with other **TrailerCam™** devices (if needed for multiple trailer fleets)

TrailerCam™ is waterproof and extremely ruggedized, capable of withstanding the highest industry standards for shock and vibrations.

Patent Pending **TrailerCam™** was developed and is being assembled in the USA, achieving exceptional levels of quality and reliability.

- ▶ 2.4GHz RF Technology
- ▶ Transmitting Distance: minimum 90' barrier free
- ▶ Highest sensitivity and image quality camera
- ▶ IR LED and switch for night vision
- ▶ Video format: NTSC
- ▶ Audio: available
- ▶ Voltage: 12V
- ▶ Lithium Ion rechargeable battery
- ▶ Operating temperature: 0 to 65C
- ▶ Enclosure material: Aluminum Alloy.
- ▶ Dustproof, waterproof, protection against hydrochloric acid
- ▶ Dimensions: 97(W)x82(H)x140(L)mm
- ▶ Compatible with all Convoy Technologies wireless monitors.
